

June 8, 2017

Office of the Governor
136 State Capitol Bldg.
Denver, CO 80203

Dear Governor Hickenlooper:

We write to you as faculty and staff at Colorado institutions of higher education in support of more aggressive climate protection goals for the State of Colorado.

We are researchers and educators from diverse disciplines who focus on the scientific, technical, and social challenges of global climate change. We support the conclusions of the Intergovernmental Panel on Climate Change, which affirms the scientific consensus regarding human-induced climate change.

We are involved in ongoing research efforts here in Colorado to discover and implement innovative solutions to mitigate greenhouse gas emissions and enhance resilience in the face of climate change impacts. As educators, we are deeply committed to help our students understand the complexity of the issue and appreciate the competing values and perspectives that shape public discourse around it. We work methodically and ardently to prepare them to meet this emerging challenge. We also recognize the importance of collaboration, outreach and engagement in which we partner with stakeholders across the state to raise awareness and develop strategies to reduce and adapt to climate change. Several of our institutions have set our own targets and goals related to climate change.

We call on you to urgently release a 2017 Climate Action Plan with specific, measurable goals to reduce greenhouse gas emissions at the state level and enhance adaptive capacity in Colorado communities.

We also urge you to make sure that this important issue is prioritized in the upcoming gubernatorial campaign.

We welcome the opportunity to meet with you and your staff to discuss ways that we can be a resource to help advance the State's climate protection efforts. Working together, we will then serve the citizens of Colorado and help position Colorado as a leader in addressing one of the most challenging issues of our time whose implications affect societal well-being and the human enterprise.

Sincerely,
277 Signatories Attached Below
