

SUSTAINABLE WATER INTERDISCIPLINARY MINOR

in partnership with

SCHOOL OF GLOBAL
ENVIRONMENTAL SUSTAINABILITY
COLORADO STATE UNIVERSITY

Water is critical to our economic, societal, and environmental well-being

Ensuring year-round availability of water in the Western U.S. requires water leaders to understand multiple users and ecosystems, while working with neighboring cities and states to balance competing water needs and make sound decisions regarding supply. These efforts are highly interdisciplinary, addressing not only ecological needs, but those of recreation, agriculture, and municipalities.

Today's water professionals must understand the history of water management, the mechanisms by which water is controlled and distributed, the economics of its development and protection, its ecology, and how its use and quality is impacted by human activities. Students who plan to work in this field should have an area of specialization as well as a solid understanding of Western water.

*If there is magic on this planet,
it is contained in water.*

- Loren Eiseley

Colorado State University is recognized as one of the world's leading institutions of higher education for water professionals

CSU has more than 200 faculty and staff who apply their disciplines to water, and over 180 water-oriented courses. Undergraduate majors — whether fishery and wildlife biology, engineering, or sociology — provide students the disciplined rigor needed to be successful, while the **Sustainable Water Interdisciplinary Minor (SWIM)** offers students an opportunity to gain deeper knowledge about the many dimensions of water. See more information regarding the minor at the [SoGES Focused Minors webpage](#) or by contacting Ryan Deming, Minor Advisor, at SWIMadvising@colostate.edu or use Calendly to [schedule an appointment in-person](#) or [schedule an appointment online](#).

SWIM students complete 21 credits in core and elective courses that are relevant to today's water professional. Completion of the SWIM is certified on the student's academic record.

WATERCENTER.COLOSTATE.EDU/SWIM

The SWIM provides students from all majors the opportunity to gain deeper knowledge about the many dimensions of water and prepare for a career or graduate study in water.

SWIM REQUIREMENTS

- 21 Total credits for completion, 12 of the 21 credits must be upper division (300 level or above).
- Some courses have prerequisite(s), and some may only be offered during certain semesters. Visit the CSU Catalog at catalog.colostate.edu to confirm.
- ¹ Enrollment in CON 476 is limited to Construction Management majors only.
- ² Students who have previously completed GR/WR304 may count this course towards the Context of Water requirement
